

Nice to Know – the Ulrich natürlich guide for your unpacked shop

Every detergent packaging has to have the following information imprinted - legibly, unambiguously, and indelibly.

- Name and trade name of the product
- Name, trade name, trademark, and complete address, including
- Telephone number of the manufacturer responsible for placing the products on the market.
- Address, e-mail address, and telephone number at which the datasheet for the medical staff is available
- The content stated on the packaging of detergents is according to the regulations specified. In addition, where necessary, instructions for use and indicate special precautions
- Detergents and cleaning agents do not belong in food bottles
- The container must have a label with the information mentioned above about the product. A Copy label does not meet specifications as it is not indelible. You can order legally compliant labels on a functional role with or without a company imprint.

Do not label the canisters with an indelible pen. It causes unnecessary use of solvents when trying to remove the label. Worst case, nobody can use the canister anymore. Clean the pump and outlet tap with hot water.

In the case of delivery by a forwarding agency, you will receive an outer carton with space for 6 x 25 L canisters.

Please do not dispose of the box, as it is ideal for returning the suitable empty container.
